As part of our commitment to the ESG criteria that guide Arabella Hospitality España’s actions, we are publishing this report so that our stakeholders can see our performance in the fields of sustainability and social responsibility, our desire to be an active and positive influence on our surroundings, and our committed alignment with the United Nations 2030 Agenda Sustainable Development Goals.

This document is an extract from the Statement of Non-Financial Information, which is part of the audited financial statements of the Arabella Group and its subsidiaries in Mallorca. It shows, in the required detail, the environmental and social aspects concerning people management, diversity, respect for human rights and the fight against corruption and bribery, as well as the risks and policies linked to all of these matters.

It has been drafted according to the methodology of the Global Reporting Initiative (GRI) 2022 Sustainability Report Presentation (“Standards” version) to respond to the Non-Financial Information and Diversity requirements provided for in Act 11/2018 of 29 December.
MESSAGE FROM THE CEO

In a constantly changing world with increasing demand for responsible business practices, we are pleased once again to set out the progress we have made as part of our commitment to keep creating value in social, environmental and governance aspects.

There is a general consensus that 2022 was the year of the recovery for the tourism sector, our main business. Despite the dark clouds that were expected due to economic and geopolitical circumstances that cooled the economy -especially from the second half of the year- the flow of tourists to Mallorca has actually developed very positively, which has been reflected in the record figures achieved by our establishments.

This has enabled us to further strengthen our performance towards a model that generates positive impacts for all those around us. In 2022 we made giant strides in a wide range of sustainability projects that have a cross-cutting aspect in common with other economic and social sectors on the islands.

We also made progress in governance issues with improvements in technology and digitisation. The increasing international visibility of our activities, which have been abundantly recognised with various awards and certifications received during the year, particularly stands out. Examples of all this can be seen below in this report.

The challenges we face in 2023 will continue to include the possible consequences of the war in Ukraine, and locally, the threats that were foreseen last year, such as the feeling of saturation and the tremendous difficulties with recruiting staff and retaining talent in our sector, as well as growing competition in the sector. We all view these factors as a stimulus to continue improving our skills.

You will see that, in order to minimise these challenges, we have continued to intensify areas of business management focused on identifying and mitigating risks. We have also strengthened our commitment to society and especially our employees, providing enhanced training to continue offering, through our greatest asset, the service quality that characterises us and makes us stand out.

We have an opportunity to develop a new concept of responsible tourism. Despite global uncertainties, we will remain faithful to our goal of continuous improvement, and we will keep making great strides in environmental and social sustainability, since we view this as an integral part of our strategy, as another lever to create value and actively participate in our community.

I would like to conclude by thanking our shareholders for the trust they have placed in us, our repeat customers for their loyalty, and above all, all of our employees and partners for their extraordinary commitment and dedication.

On behalf of the Board of Directors, thank you very much.
